Memo to File:

Re: Georgia Pacific
Gypsum Quarries
ACT/041/009

An attempt was made by Ron Daniels, Jim Smith and Mike Thompson to inspect the gypsum quarries operated by Georgia Pacific at Sigurd, Utah on January 5th, 1978. Due to snow cover, the field inspection was cancelled, however a meeting involving Mr. C.H. Hummel, the Plant Manager took place.

Mr. Hummel stated that mining was progressing as set forth in the mining and reclamation plan. The possibility of establishing vegetative test plots was discussed. A field inspection will be arranged in the spring. Arrangements should be made with Mr. Hummel so that the Quarry Foreman can be there. Dave Moody replaced Ed Cole, Chief Mining Engineer, of Gypsum Division.

MIKE THOMPSON *Xmp*
RECLAMATION HYDROLOGIST
